

SciRhom GmbH, based in IZB Martinsried, Germany, is a biotech start-up company that translates science into the preclinical and early clinical development of novel biopharmaceuticals for the treatment of life-threatening diseases. Founded in late 2016, we develop first-in-class antibodies against iRhom2, a key modulator of several crucial pro-inflammatory signalling pathways, including TNF-alpha signalling. We are now pursuing the preclinical and early clinical development of these monoclonal antibodies for the treatment of autoimmune and other serious diseases.

We are a young and growing company with an excellent firm culture and are looking for someone to support our pre-clinical drug development team in Martinsried near Munich.

We offer a full-time position as (Junior) Scientist – Immunology (m/f/d)

Your Tasks

- ❑ Plan, execute, and analyse laboratory experiments to support the mechanistic understanding of our therapeutic antibodies
- ❑ Develop, optimize, and establish molecular and cell-based assays to characterize the mode of action in different indications
- ❑ Communicate ideas, experimental strategy, methods and results to supervisor and relevant team
- ❑ Maintain an up-to-date awareness of scientific literature relevant to target biology
- ❑ Perform other related duties as required by position
- ❑ Documentation according to industry standards

Your Profile

- ❑ Ph.D. degree in the field of Immunology, Biotechnology, Cell or Molecular Biology, Biomedical Science, Biochemistry or related disciplines
- ❑ Strong background and profound knowledge in Immunology is mandatory; experience in the area of drug development in the field of auto-immunity is advantageous
- ❑ Expertise in cell biological, immunological, molecular biological and/or biochemical techniques
- ❑ Passion to deliver against timelines
- ❑ Hands-on mindset and highly motivated to learn
- ❑ Organised with strong attention to detail
- ❑ Strong problem-solving and troubleshooting skills, and ability to contribute constructively to discussions
- ❑ High level of commitment, sense of responsibility, and capability to work in a team
- ❑ Excellent written and verbal communication skills in English

Your Prospect

- ▣ An exciting and challenging position in antibody drug development
- ▣ Taking on responsibility and ownership in experimental activities
- ▣ A dynamic work environment with a highly motivated and experienced team, working together in a cooperative atmosphere
- ▣ Company structure with flat hierarchies and fast decision-making processes
- ▣ Room for personal and career development
